TTF Scaffolding Inc.

PREPARING EQUIPMENT FOR RETURN

How to bundle, strap and pack TTF equipment so your return is counted fast and correctly.

THE 3 GOLDEN RULES

1. **Same size together**
   Never mix sizes or types in one bundle.

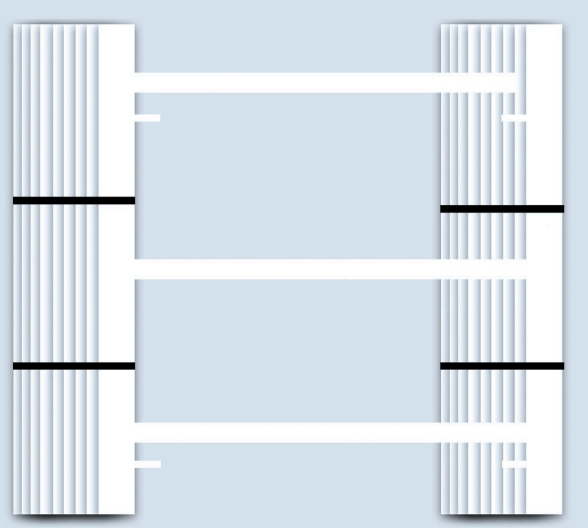

2. **Two straps per bundle**
   Every bundle and pallet gets two straps.

3. **Count it right**
   Use the bundle counts in the table. Full bundles are quicker to check.

QUICK REFERENCE

#	ITEM	PACK AS	QTY	KEY POINT
1	**Steel / Aluminum Frames**	BUNDLE	25	Lay flat on the ground to stack
2	**4×6 Wood Joists**	BUNDLE	40	5 rows of 8

6	**Cross Bars**	BUNDLE	25	Same sizes together
7	**Beam Clips**	BAG	100	Tie with wire or zip tie
8	**Coupling Pins**	BAG	50	Tie with wire or zip tie

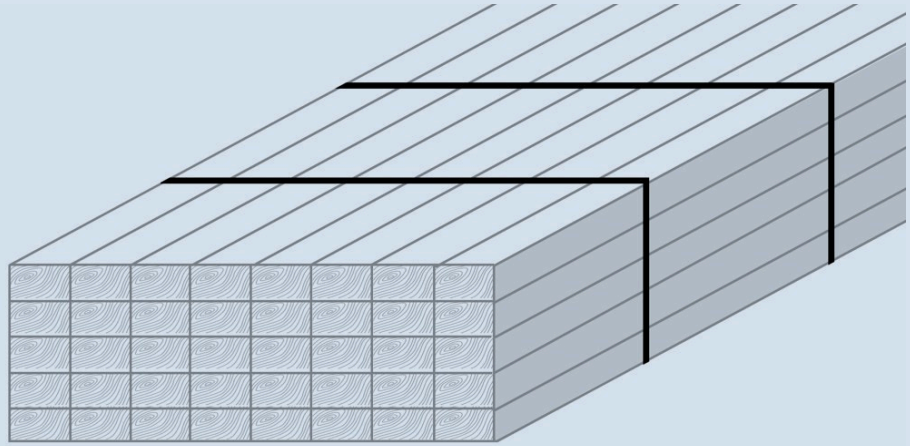

1 STEEL / ALUMINUM FRAMES

25	2
PER BUNDLE	STRAPS

- ✓ Bundle 25 frames together
- ✗ **Do not mix different sizes**
- ✓ Lay the frames flat on the ground to stack
- ✓ Use two straps

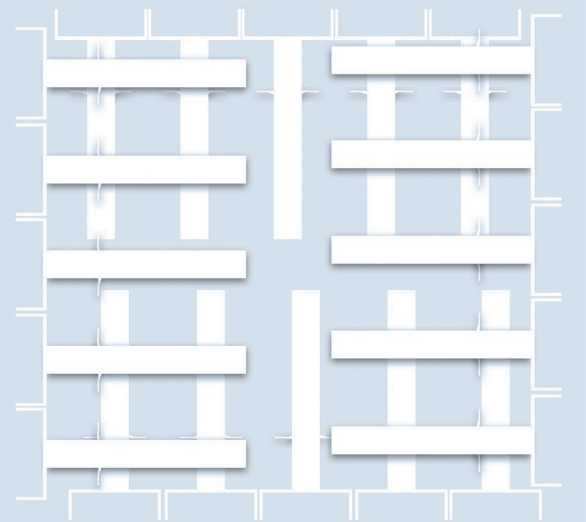

2 4X6 WOOD JOISTS

40	5 × 8	2
PER BUNDLE	ROWS × PIECES	STRAPS

- ✓ Stack 5 rows of 8 pieces = 40 per bundle
- ✓ Keep the same lengths together
- ✓ Use two straps

3 U-HEADS & BASE PLATES

100	2
PER PALLET	STRAPS

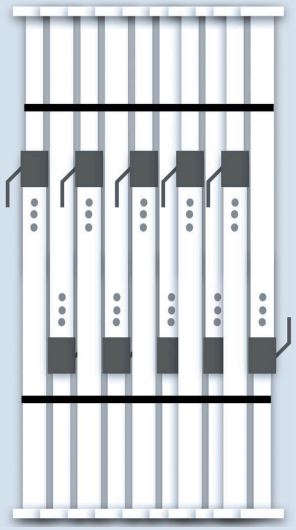

- Pack 100 pieces per pallet
- **Do not mix U-heads and base plates**
- Put a sheet of plywood on top and strap it down
- Shrink wrap the pallet
- Use two straps

4 ALUMINUM BEAMS

30	2 × 15	2
PER BUNDLE	ROWS × PIECES	STRAPS

- Stack 2 rows of 15 = 30 per bundle
- Nest the beams inside each other, alternating up and down
- Keep the same sizes together
- Use two straps

5 POST SHORES

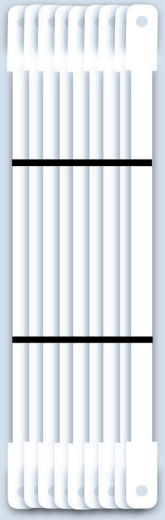

50
PER BUNDLE

5 × 10
ROWS × PIECES

- Stack 5 rows of 10 = 50 per bundle
- Blue and black shores: put a 2×4 between each row
- Insert the pin in every shore

6 CROSS BARS

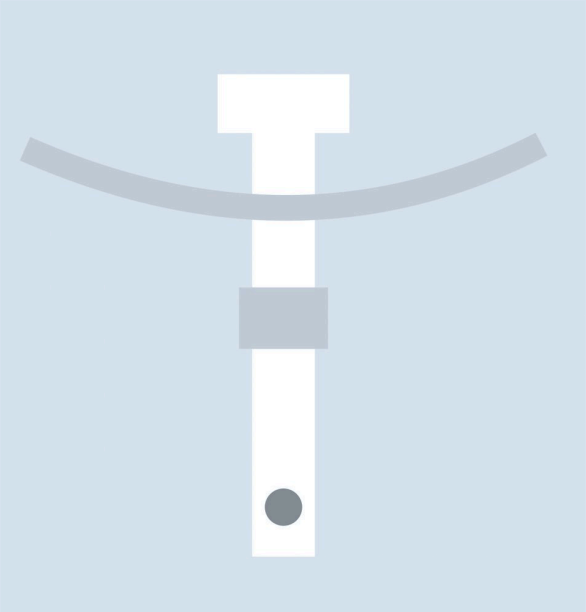

25
PER BUNDLE

2
STRAPS

- Bundle 25 cross bars together
- Keep the same sizes together
- Use two straps

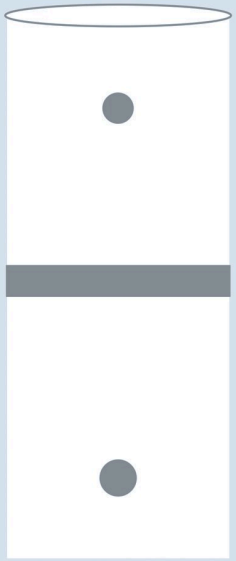

7 BEAM CLIPS

100
PER BAG

- Put 100 clips in each bag
- Tie the bag closed with steel wire or a zip tie
- Need bags? Let TTF know and we will supply them

8 COUPLING PINS

50
PER BAG

- Put 50 pins in each bag
- Tie the bag closed with steel wire or a zip tie
- Need bags? Let TTF know and we will supply them

1 **53′ Flatbed: Mixed Load**

Frames, beams and bundles grouped together and strapped across the deck.

2 **53′ Flatbed: Full Load**

Frames stacked on top of beam bundles, loaded by forklift.

3 **Flatbed: Steel Frames**

Frames stacked two high and strapped at every row.

4 **Tandem Flatbed: 4×6 Timbers**

Heavy 4×6 bundles on the bottom, lighter bundles on top.

HOW TO LOAD TRUCKS

Tandem & Crane Trucks

5 **Tandem Flatbed: Frames & Beams**

Bundles kept together and strapped tight with ratchet straps.

6 **Crane (Hiab) Truck: Frames**

Loaded so the crane can lift each bundle off on site.

LOADING TIPS

- Heaviest and longest bundles go on the bottom
- Strap every row and every bundle tightly
- Keep the same items and sizes together
- Leave room for forklift or crane access
